ADVANCED PROJECT MANAGEMENT CONCEPTS
FIVE DAYS

Prerequisite

The student should have already completed an "Introduction to Project Management" course and have at least one year of actual Project Leader experience.

Who Should Attend?

This course is intended for experienced project leaders who are managing or participating in Information Technology (IT) projects. This includes both information technology and business partner personnel.

Course Description

- *Advanced Project Management Concepts* is designed to teach students how to apply the concepts, tools and techniques of Managing Project Politics, Systems Thinking, Risk Management, Resource Management, Scheduling Uncertainty, Cost Control, Change Control, Managing Vendors, Project Evaluation, Managing Quality, and Project Management Process Improvement to managing IT projects. A case study provides practice in how the tools and techniques discussed are used to assure project success.

Course Topics

- The Roles of the Project Manager
- Tools and Techniques
- Planning and Scheduling
- Project Control and Evaluation
- Optimizing Project Performance
